

Virtuoso Helix Speaker Cable

Heavy Silver-Plated 16 ga. CCT Copper Conductors

low-resistance premium, bi-wireable positive helical conductors

Super-Foamed Polypropylene

low loss dielectric for excellent signal control

Microporous Foam Teflon Tape

reference-level dielectric between positive conductors and negative braid shields

Silver-Plated OFHC Copper Braid Shield

Foam Polypropylene Tape

mechanical and electrical insulation

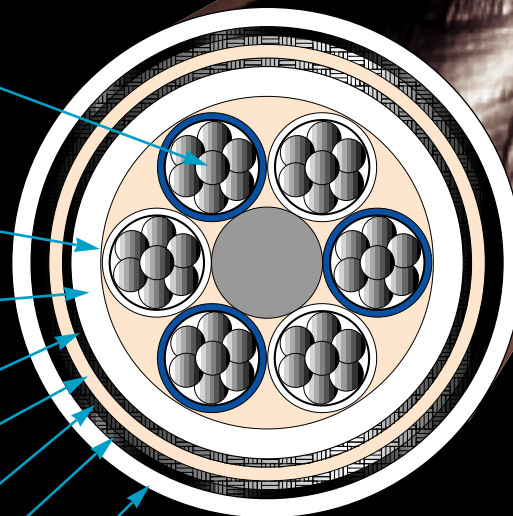

Silver-Plated OFHC Copper Braid Shield

Black Fiber Braid

controlled airspace filler to minimize microphonics

Clear PVC Jacket

durable, cosmetically appealing

NEW

Virtuoso Helix Speaker Cable combines premium materials into Straight Wire's first SYMMETRICAL HELIX DESIGN. This breakthrough development blends the finest aspects of our renowned CCT Helix (positive conductors) with our Symmetrical Coax (negative conductor braid shields). Skim-coating the helical low-resistance positive conductors controls electrostatic effects while the microporous Teflon controls electromagnetic effects. The Dual Silver-plated braid shields eliminate external EMI and permit bi-wiring. Virtuoso Helix Speaker Cable is a must for serious audio enthusiasts.
